

A stylized blue robot head logo is centered in the background. It features a semi-circular top with horizontal lines, a central circular eye, and a body with vertical lines and circular joints.

DV DIGEST

Improving the verification information
space

Brodie Grant

The Information Space

The verification information space is highly fragmented. Leading to:

- Underinformed engineers
- Duplication of projects, inefficiency of effort
- Missed opportunities for collaboration

Examples:

- OVM vs VMM
- SystemVerilog's DPI quirks
- Verification IP (VIP) duplication

The DV Digest

The DV Digest is a dedicated verification podcast.

- We produce digestible 30-minute interviews with DV leaders.
- Promote DV methodology visibility and collaboration.
- Short form, high-level and highly-relevant.

Experts we've interviewed

Andrew Bond
Director of
Verification
Axelera

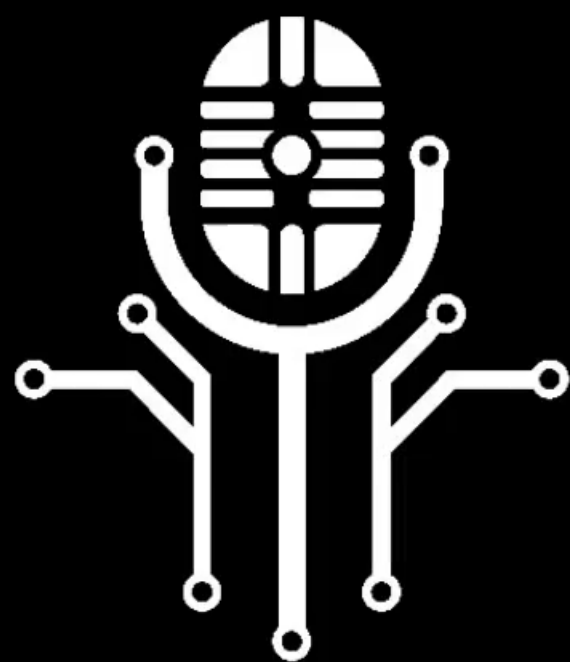

Abhi Kolpekwar
VP of Verification
Siemens

Tudor Brown
Co-founder
Arm

Matt Graham
Group Director of
Verification
Cadence

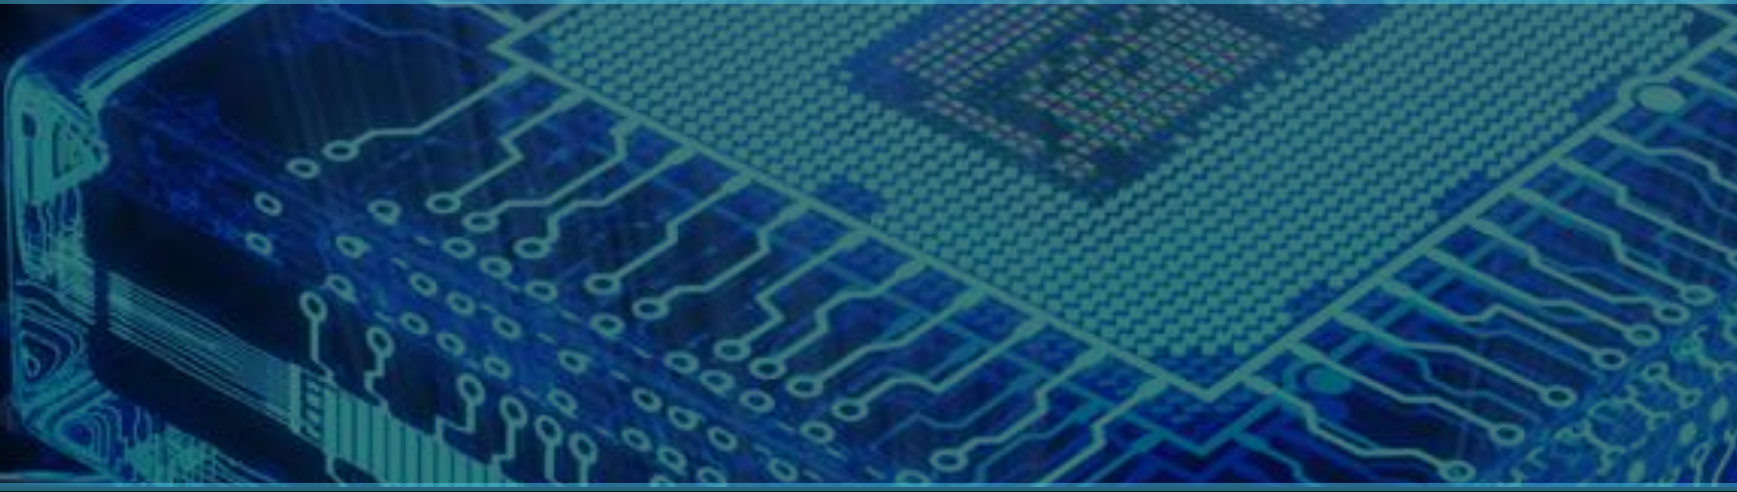

DVDIGEST

How This Helps DV Engineers

- Supporting AVL
- Cocotb's vision
- EDA vendors plans for AI tools
- More information = better outcomes

Our Story So far

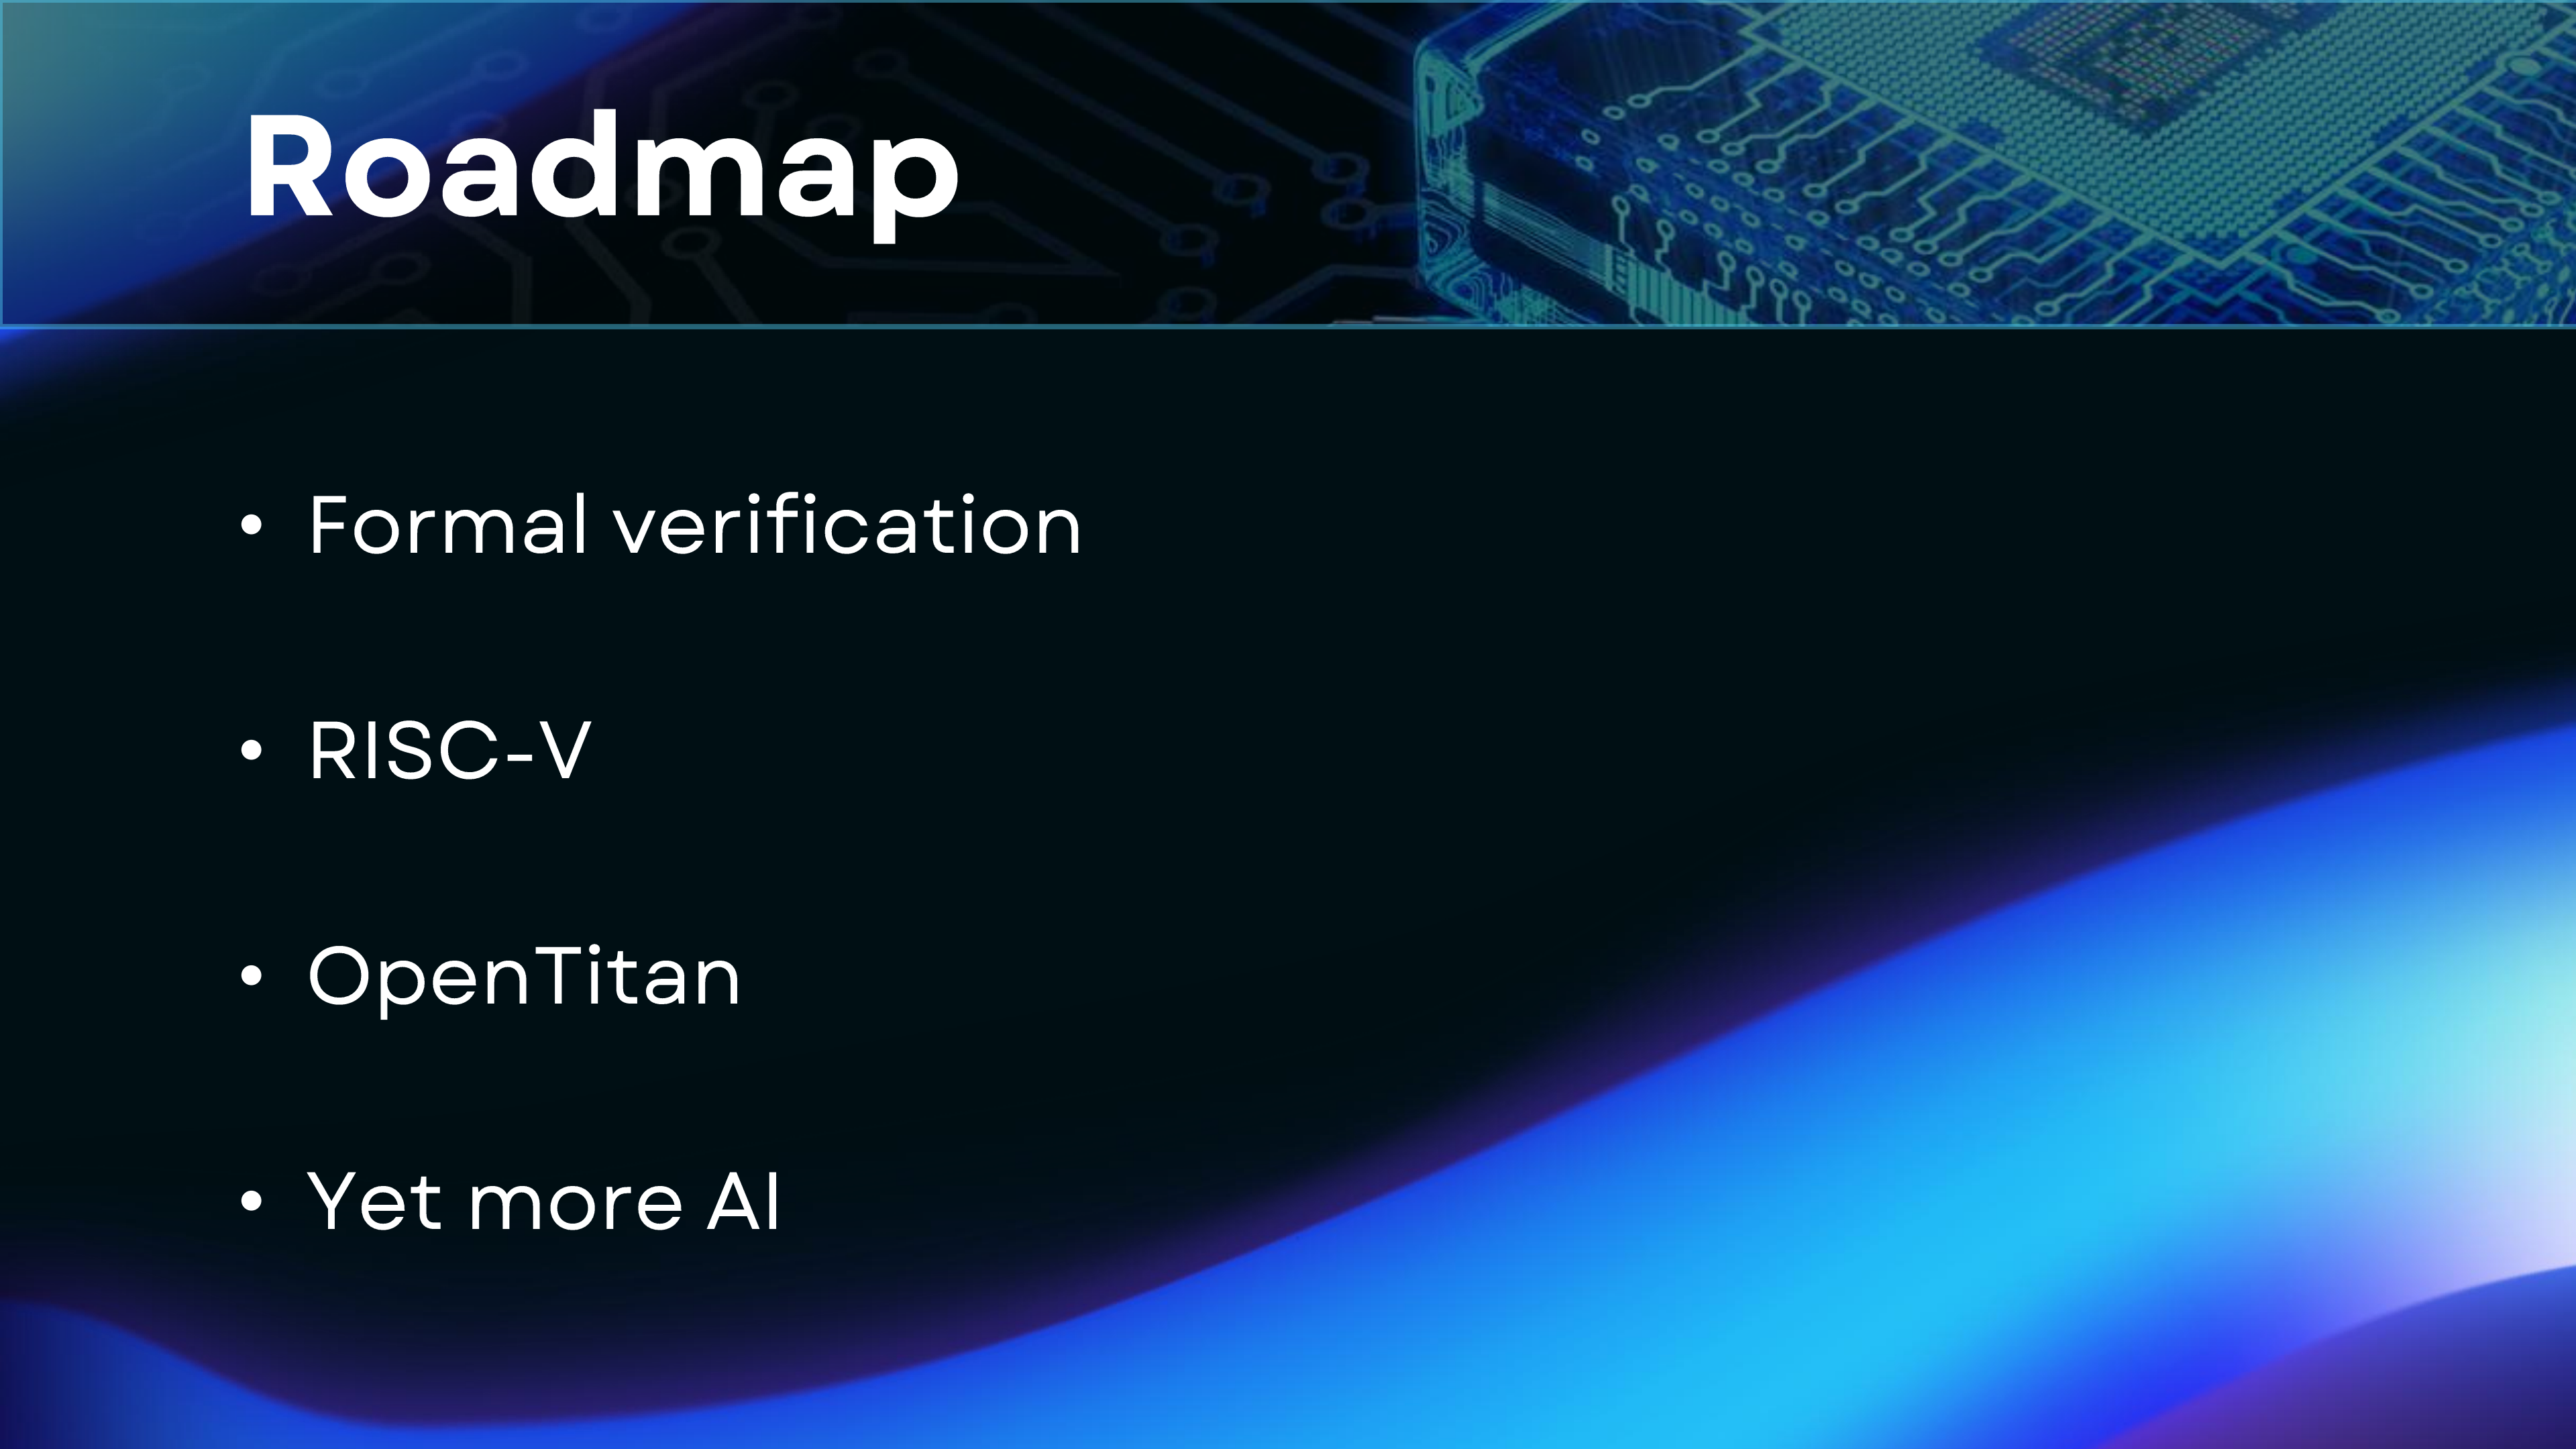

We launched The DV Digest 3 months ago.

In that time:

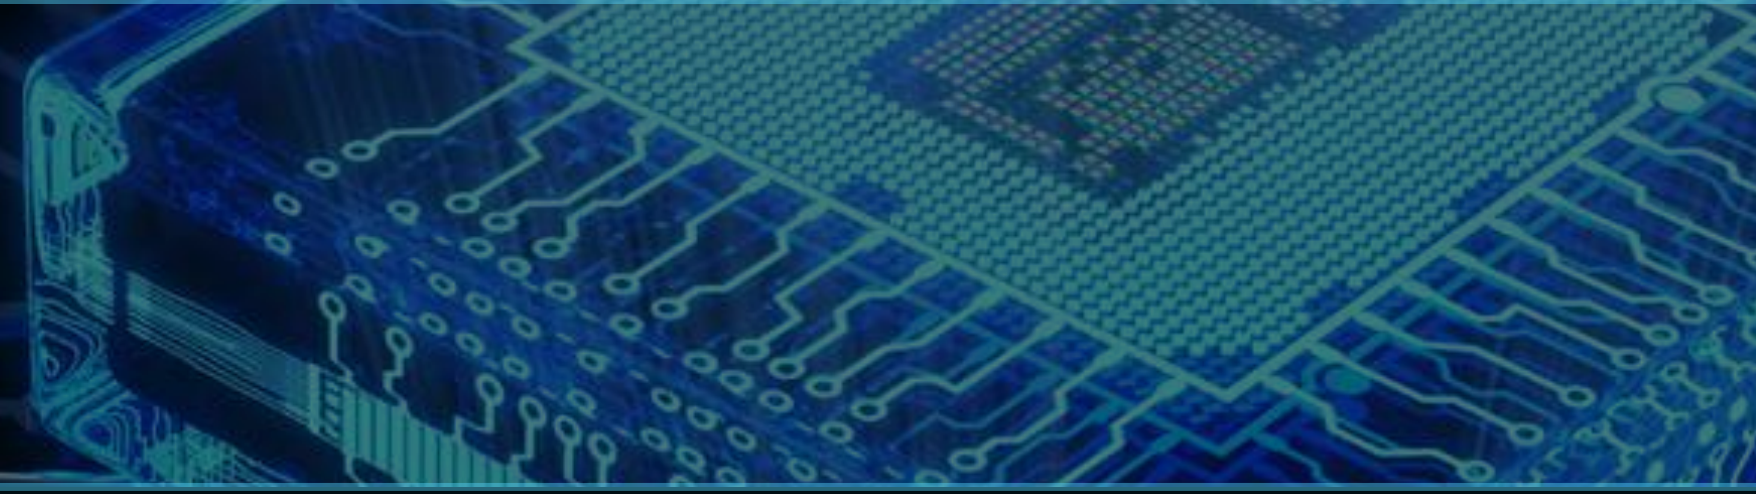

- Released 5 videos
- Had more than 3000 views
- Gained over 800 subscribers and followers.

Roadmap

- Formal verification
- RISC-V
- OpenTitan
- Yet more AI

The DV Discord

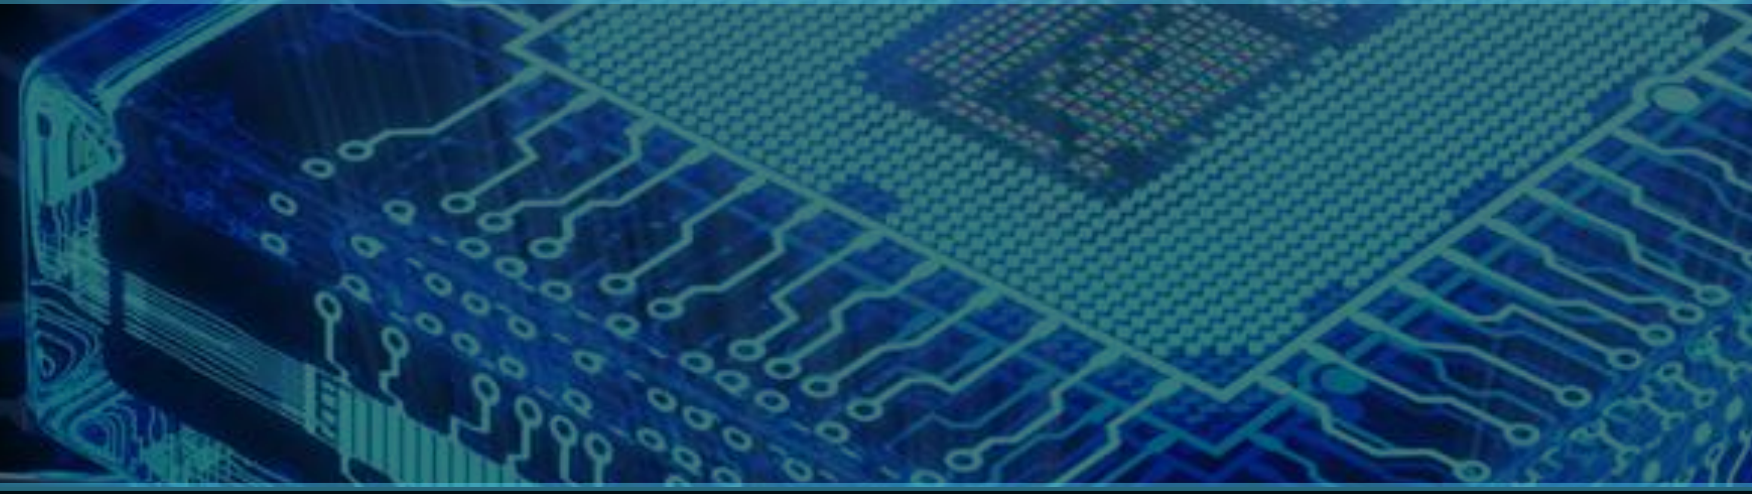

- Technical conversations
- Question suggestions for guests
- Discussion on news
- Conversations with guests
